First in India to launch
VOC FREE Colourants
Tinting Technology
with Italtinto, ITALY

Directions For Use

The surface to be painted should be clean, dry and free any loose Paint film, dirt, chalk, grease, fungus and algae. This can be done by wire brushing followed by water jetting. Where there is excessive fungal growth, the surface should be treated with Acme Antifungal solution.

For filling of crack and leveling of substrate use cement plaster Acme 100% Exterior Emulsion can be used as a primer by thinning with 1:1 by volume of clean water followed by 2 coats of Acme 100% Acrylic Exterior Emulsion as a finishing coat by thinning approximation at an interval of 2-3 hours between the coats. Acme 100% Acrylic Emulsion can be applied by brush, roller or spray.
